

Opti-Blast Plastic Media

Plastic blasting media is perfect for the removal of unwanted materials from a variety of components, from aircrafts and automobiles, to engines and electronics and to boats and other recreational vehicles.

Whether you're in the need of an automotive paint stripper, an aircraft paint stripper or a product ideal for wet abrasive blasting, Opti-Blast can meet your needs.

T-2 Urea

T-2 Urea has a Barcol Hardness of 54-62, making it the most versatile plastic blast media.

It is highly suitable for a broad range of cleaning and stripping applications, including aircraft, automobiles, marine vessels, trucks and trailers.

Superb results can be expected in the removal of paints, anti-corrosion coatings, hydrocarbon deposits, waxes, oils, adhesives, and sealants to name a few.

T-2 for optimum results on a variety of applications.

MIL SPEC Urea also available

T-5 Acrylic

T-5 Acrylic has a Barcol Hardness of 46-54, making it especially suited for a broad range of applications that require high stripping rates coupled with the need to insure surface integrity.

T-5 Mil Spec media meets or exceeds the requirements set forth in MIL-P-85891A

Ideal for aircraft components, it is also excellent for powdercoating removal from pultruded aluminium parts, thin fibreglass components, thin gauge metals, and of course aircraft components

T-5 Mil Spec for optimum results where surface integrity is a must.
